Election/Restrictions

Claims 14-19, 21 and 22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on March 17, 2005.

Applicant's election with traverse of Species I and Sub-species A, referring to Fig. 1A in the reply filed on March 17, 2005 is acknowledged. The traversal is on the ground(s) that the election requirement is improper because the Applicants present an allowable claim generic to all species. This is not found persuasive because the Examiner still believes that the non-elected claims belong to different species and they are not generic claims.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 20 and 23-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Gregory US Patent 6,110,212.

Gregory discloses a biocompatible tissue implant comprising a biocompatible tissue slice having a geometry, the tissue slice including an effective amount of viable cells and further being dimensioned so that the cells can migrate out of the tissue (see Figs. 1 and 2; col. 3, lines 22-29).

Regarding claim 2, see col. 3, lines 46-52.

Art Unit: 3738

Regarding claims 4-7, see col. 5, lines 52-62.

Regarding claims 9, 10 and 25, the adhesive is at least one tissue layer welded by an energy source (see col. 6, lines 43-55; col. 7, lines 8-49; and col. 7, lines 59-61).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-13, 26 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gregory US Patent 6,110,212 in view of Brauker et al US Patent 6,773,458 B1.

Gregory discloses the invention substantially as claimed. However, Gregory does not disclose minced tissue fragments.

Brauker et al teaches a tissue implant comprising at least one minced tissue fragment (with a size range of about 1mm^2) containing a plurality of viable cells for the purpose of increasing the biocompatibility of the implant (see col. 13, lines 51-59).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Gregory reference with the Brauker et al reference in order to increase the biocompatibility of the implant.
